

# REQUIREMENT ANALYSIS

## 1. Project Overview?

The goal of this project is to create a web-based platform that combines social media and news functionalities with crowdfunding capabilities. The platform will provide users with a single destination for their social media and news needs, while also giving them the ability to crowdfund projects or initiatives they care about.

## 2. To what extent the system is proposed for?

The social media application can be used to express our opinion on the present social issues which are presently existing in the society. And also in the present situation, social media usages are also very high. So in order to use the social media usage time more fruitful we introduce a session to know the news update.

## 3. Specify the Viewers/Public which is to be involved in the System?

The General public are involved in the system.
